SENSELY

Integrated Mental Health

Depression, anxiety, stress, and insomnia are serious. Provide your members and patients with the information and support they need.

Empower users with a baseline clinical triage, customized resources, and information to improve their wellbeing. Featuring validated assessment capabilities, as well as options for wellness checks and self-monitoring, Sensely Mental Health offers both responsiveness and convenience.

USER JOURNEY

A streamlined experience offers a building block suitable for broad population bases as well as a platform for future customization

User information: age, gender, current concern

Mini-Triage: assesses frequency, stability, and level of impairment

DASS 21 Assessment: quantification of distress for specific types of common symptoms

Resource Support: further assessments and extensive targeted health content

ENTERPRISE CUSTOMIZATION OPTIONS

Designed to allow further refinement specific to your unique user population and your organizational objectives

Navigate users to programmatic offerings based on assessment results

Safely and accurately triage to local or enterprise-specific treatment channels

With identity verification, start future interactions based on past conversations

Engage Sensely's Conversation Design team to design and enhance specific user interactions
